AB In an antireflection film on a transparent substrate comprising a laminate of .gtoreq.1 transparent high-n film, .gtoreq.1 of which is elec. conductive, and .gtoreq.1 transparent low-n film, the outermost layer formed on the low-n film is a F-contg. polymer or is coated with a F-contg. polymer. Preferably, the elec. conductive film is based on Sn-doped In oxide, SnO₂, and/or ZnO.
